S² Summer Science Enrichment Program

Offered at San Diego Miramar College

Sponsored by the Southern California Biotechnology Center

This summer enrichment program for children entering grades 5-8 will include hands-on learning of scientific topics while encouraging scientific method with a focus on human health topics.

Students will have a great experience in state-of-the-art laboratories on the San Diego Miramar College campus investigating a variety of disciplines in science including Experimental Design.

Sessions are taught by qualified educators in Biology, Chemistry, Physics, Human Anatomy, Physiology, and Biotechnology.

The program is taught in five week-long sessions (exact dates to be announced.) Each session is held Monday-Friday from 9am-12pm.

For registration and cost information please contact:
